"Since the introducing the Dacol collection system into our leisure centers, the cost and time saving benefits are clear to see. The PA600 offers our staff a easy-to-use tool capable to capture all relevant data at the point of activity."

Colin Clark
Centre Manager
East Hull Baths

Solution

The Dacol solution is the unique, new, benefit-packed data collection system designed for the leisure industry. Improving your existing system, this accountable, easy to use, highly reportable solution fulfills your health & safety requirements including Quest accreditations and other schemes.

Dacol guarantees the collection of data on-time, at the correct location. It allows you to view snapshot intelligence of your site operations, identifying critical problems that require immediate response as well as less frequent, more in depth audit appraisals.

It saves your operatives time and increases the accuracy and consistency of your health and safety data. It provides reliable, long term electronic data storage, comprehensive historical analysis and in-depth reporting tools.

The PA600 is at the forefront of all these activities. The form factor offers unsurpassed ergonomics and its LCD screen allows users to capture easily all required data.
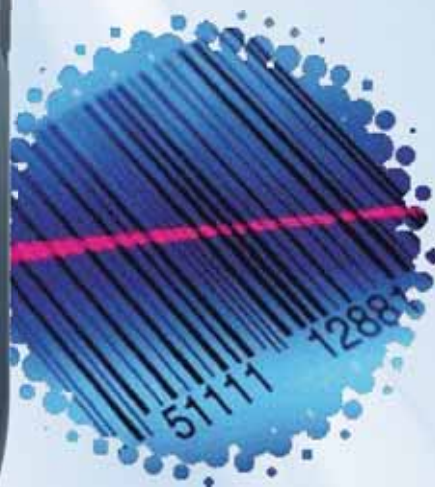

Dacol is specifically tailored to each individual premises and evolves organically as your operations change. Full networking adds the additional benefit of remote access premises management. Dacol offers these features and benefits within a budget you can afford.

Unitech's PA600-series is offering high level protection against dust and water making it an ideal terminal in environments such as swimming pools, restaurants and other leisure places.

Readings you can record using Dacol:

- pH & chlorine levels
- Security, access & alarms
- Temperatures
- Cleaning & hygiene
- Fire & risk management
- Safety & security
- Facilities management
- Wet side & dry side maintenance
- General operations

...in fact, complete flexibility to suit any requirements
